Simon Livson

AI/ML Engineer in training | Crypto Research Analyst

Jerusalem, Israel (hybrid or remote) | simon.livson@gmail.com | linkedin.com/in/simon-livson-8630626a | github.com/simonlivson | huggingface.co/SimonIL

SUMMARY

AI/ML Engineer in training at Developers Institute (GenAI & ML Bootcamp, graduating January 2027), learning to build LLM apps with Python, RAG and AI agents. Crypto research analyst since 2021, with product research on zero-knowledge proofs and MPC at dWallet Labs and seven published crypto and equities articles at Myntra Capital. As Chief Rabbi of Finland, led a national community, its staff and budgets. Brings domain knowledge, clear writing and stakeholder skills to AI teams in crypto, fintech and AI-first startups.

TECHNICAL SKILLS

AI & ML (learning in bootcamp): Python, pandas, NumPy, data visualization, scikit-learn, machine learning, deep learning, NLP, LLMs, prompt engineering, RAG, LangChain, vector databases (Pinecone), embeddings, AI agents, Hugging Face, OpenAI API
Tools: Git, GitHub, Jupyter Notebook, Google Colab, Claude Skills (SKILL.md)
Domain: crypto and Web3 research, tokenomics, zero-knowledge proofs, MPC, cross-chain bridges, equity analysis

TECHNICAL PROJECTS

Crypto Whitepaper Summary (Claude Skill) - GitHub
- Turned my analyst workflow into a reusable AI skill that converts any crypto whitepaper into the same one-page research note: what it is, how it works, token model, team, risks and verdict.
- Kept every note grounded in the source document, writing "not stated" for missing facts, so it never invents claims.

Python Games and Bootcamp Exercises - Tic-Tac-Toe | Hangman | DI_Bootcamp
- Built two command-line games in week 1: tic-tac-toe that rejects invalid moves and detects wins and ties, and hangman that validates each guess and blocks repeated letters.
- Published all bootcamp exercises on GitHub, from Python basics to pandas and NumPy data analysis notebooks.

EXPERIENCE

Crypto & Equities Analyst, Myntra Capital, Jerusalem, Israel — 2025 – 2026
- Published 7 research articles as byline author on stablecoins, RWA tokenization, Bitcoin's 4-year cycle, AI and crypto, crypto treasury companies, gold and silver, and the Iran war, giving readers clear, evidence-based market views.

Independent Crypto Research Consultant, Self-employed — 2021 – Present
- Advise private clients on crypto projects, token models and market cycles; clients make their own portfolio decisions.
- Began with self-directed crypto study after leaving the rabbinate; relocated to Israel in Aug 2022.

Product Researcher, dWallet Labs — 2022 – 2024
- Produced 80+ internal research briefs and analyses on zero-knowledge proofs, MPC, modular chains and cross-chain bridges that informed product direction.

Content & Social Lead, MMI, Tel Aviv, Israel — 2023 – 2024
- Planned and ran social media campaigns, writing the content published on the company's channels.

Chief Rabbi of Finland, Finnish Jewish Community, Helsinki, Finland — 2012 – 2021
- Led Finland's Jewish community (~1,300 members), managing ~45 community and school staff and the budget.
- Represented the community to the Finnish government, media and interfaith partners, building lasting relationships.
- Spoke regularly in public, in lectures and in media interviews, making complex topics clear to wide audiences.

EDUCATION

GenAI & ML Bootcamp, Developers Institute — 2026 – 2027
BBA in Finance and Economics, Helsinki Business School — 2002 – 2006
Rabbinical Ordination, Yeshivat Chovevei Torah (YCT), New York — 2010 – 2012
Rabbinical Ordination, Yeshivat HaMivtar, Jerusalem — 2007 – 2010

CERTIFICATIONS

DataCamp, 22 certificates (Oct 2026): Associate AI Engineer for Developers track, Developing AI Applications, Python Programming Fundamentals, Data Manipulation with pandas, LangChain, Pinecone, OpenAI API, Embeddings, Prompt Engineering, Hugging Face, LLMOps, Git

LANGUAGES

Finnish (native), English (fluent), Hebrew (fluent), Swedish (basic)

ADDITIONAL

Served in the Finnish Defence Forces (military service).
